

Please reconsider having Low Power FM broadcast services take priority over FM translator services as I am an avid listener to K-LOVE transmitting over an FM translator service. I rely on K-LOVE to help me handle life's issues and opportunities and to share this with others in my community. Without K-Love broadcasting locally, many people will not have as much opportunity to hear the encouraging message and songs that K-Love broadcasts. This world needs a positive message amidst the awful news and events that happen in this world. This is a public service and benefit, not just another radio station.
